

Kitten Vaccine Protocols

These are basic protocols and may be altered by your veterinarian depending on the specific needs of your kitten.

Week 8: 1st FVRCP, deworm

Week 12: 2nd FVRCP, 1st FeLV,
deworm, test for
FeLV/FIV

Week 16: 3rd FVRCP, 2nd FeLV,
Rabies, deworm

What else does my kitten need?

- Spaying and neutering is highly recommended between 5-6 months of age. This is especially important for females before their first heat cycle.
- We recommend that any declaw procedures be performed at the same time as their spay or neuter since younger cats have an easier recovery from this procedure.
- Year round heartworm prevention: Yes, cats can get heartworms and only one heartworm is needed to kill a cat.
- Year round flea/tick protection.
